In Rogation week expect wind rising sudden and stormes  
 And about the 16 & 17 expect dark weather with hails or  
 thunder; Thunder also will come about the 24 & 25. And in  
 a word many more dayes this month.

Wind and clouds the 1 day, if not some were still the 10 day  
 No wind and clouds, the 11 and 12 like to be some hail and  
 thunder, the 13 and 14 threaten storms, the 15 and 16  
 mists or rain, the 16 very hot. But on the three last days  
 cool and dark misting weather.

Some rain on the 4 day; otherwise mild and temperate till  
 about the 6 day; and then cold wind and storm follow, with  
 snow or sleet now and then. And the 10 if before it be cold  
 and warm; but on the 11 and 12 a cold storm will come  
 then. About the 13, 14, & 15, cloudy and dark with some  
 very cold rain, the dayes following like to be froly.

| 31 | Silvest. Sunday:  | Sagit. |                        |

The month beginning with cold winter weather, and some  
 snow for a good space, affording now and then some snow  
 on the 14 shower, and on the 19 great winds. And when  
 on about the 24 it began to be frosty again, and so con-  
 tinued to the end of the month.

# A Prognostication.

And perfect computation of the Seven  
Ages of the World.

Creation to the Flood 1656. *The 1. Age.*  
Flood to the Promise 437. *The 2. Age.*  
Promise to the Law 430. *The 3. Age.*  
Law to the Temple 480. *The 4. Age.*  
Temple to the captivity 409. *The 5. Age.*  
Captivity to Christ 608. *The 6. Age.*

7. Age beginneth at the birth of Christ,  
and continueth, according to the vulgar Ac-  
count, 1647. years fully and compleat, for now  
it is 1643.

To note, that whereas I mention 608 yeeres  
from the Captivity to Christ, it is meant of 609  
yeeres from the beginning of the Captivity  
the 4. year of Jehoiachin, to the first yeere  
common Era of Christ's Nativity which be-  
fore also, that by this computation it ap-  
pears, that from the Creation of the World to the  
year present, are 5658 yeeres current, there  
of 5657 yeeres compleat and finished at, or at  
the time of our Decall Quinor: And this  
is about, is because there were 1. dayes  
of Creation past, before the Sun and Moone  
made. Others, though they reckon the  
number of yeeres from the Creation divide  
it in otherwise; and thereupon account but  
ages.

Et cum vireant tunc est nova temporis ætas,  
cuius per Ver incipendus erit.

G

Memorabi

## A Prognostication.

Memorable Accidents; or a Chronological description of many things worthy of memory, shewing how long they hapned before this year of our Lord, 1648.

**T**HE Creation of the World 5658  
Noahs Flood 4000

The Promise made to *Abraham* 3975

The Children of Israel came out of *Egypt* 3141

*Salomon* began to build the Temple 2665

*Nebushadnezar* burnt the Temple 585

The destruction of Ierusalem by *Titus* 1570

The writing of the Revelation by *St. Iohn* 1553

The first Generall Council 1323

Cambridge was made a University 1098

England was conquered by *Dr. William* 584

The first Major of London 1389 458

Since The invention of Gun 1470 268

The invention of Printing 1476 208

Coaches were first used in England 93

The new Starre in Cassiopea 1534 227

The whole Heavens seemed to burne 3117

*Tilbury* Campe on *St. James* his day 1560

The Voyage to *Cadix* 1593 58

The Gunpowder Treason, Novemb 5. 1605

The great Frost 1607 100

The last Blazing Starre 1607 30

Prince Charles was borne 1600 18

*Thomas Parr* dyed, being 152 yeares old. 153

Note that on the 27. day of March we are to begin the 21. year of our King, for then he hath reigned 22. years compleat. *Vivat Rex.*

## A Prognostication:

+++++

Of the four Seasons or Quarters of the

Year, the first is the Winter, or the Season of the  
 Snow, which gives beginning to the Spring, &  
 from whence the Revolutions of the World are  
 Astronomically reckoned, because at that time of  
 the year the world was created. At the time of this  
 Season, the sun was then about the 21st of April, &  
 1 day of the week. The sun being then at the  
 Full; the Cycle of the Sun was 1, the Dominical  
 Letter G, and the Golden Number 4.  
 Thus it was then: but now the Equinox is too  
 near, and will be this year on the 2 day of March  
 11 min past 12 clock at night; at which time the  
 degree and 33 minutes of Libra is in the hor-  
 izon; and the 21st of April is in the middle of Heaven  
 the reason of which difference is, in regard of  
 the antipation of the Equinoxiall, which in  
 one year amounts to 10 minutes and 4 seconds  
 increasing to the quantity of 2 day in the space  
 of a hundred years.  
 The Summer Solstice, or the Summer Solstice,  
 begins alwayes with the Suns entrance into  
 Cancer, which will be this year on the 21 day  
 of June; almost halfe an hour before 12 clock in  
 the morning, at which time the dayes be at the  
 longest, and nights at the shortest; the day being  
 16 hours 49 minutes, and the night 7 hours 11 minutes.

## A Prognostication

then with us at and about Cambridge, 16. houres  
and 2. minutes less from our rising, & Sun set-  
ting. And note, that within one fortnight and  
three dayes after this, there shall be a very  
remarkable conjunction of the two Malevolent  
Saturne and Mars, in the 17. degree of Gemini.  
which is like to produce here, Thunder, and  
a tempest, and doth threaten many more to many  
places under the influence that are at 100.

Moreover, of the Quarters of the year, that  
followeth next, and is called the 3. quarter, under  
the influence of Mars which shall be this year  
on the 1. day of September, it shall continue  
past, in the afternoon, and shall be the day  
and night of equal length as they were in the  
Spring. This quarter endeth not until the  
sun hath run through Libra, Scorpio, and Sa-  
girarius. That which is next is called the 4.  
quarter, in that part which we call winter quarter  
it begins with the suns entrance into Capricorn  
which shall be this year on the 1. day of Decem-  
ber. 2. minutes, past. At which in the morning the  
nights are as long now as the longest days  
were in summer; but, 16. hou and 24. minutes shorter  
thanest of. It shall be no more for the length of  
the day now, then 7. houres and 24. minutes. This  
quarter endeth not until the sun by his course  
hath run through Capricorn, Aquarius, and Pi-  
ces.

A line aturn in the 3. house, not far from the  
stars Jabbiter is in the 10. house, not far from the  
1. house heart. Mars is neare the beginning of the  
3. house, and so is next the end of it, Venus is in  
the

## A Proposition. A

the house, not far from the mouth, and in the 6<sup>th</sup> house is Mercury in 7. 49. of Aries. A line ascends, and therefore Venus should govern the Horoscope; but because Scorpio is so near, Mars will have the greatest share in the Dominion of the first house.

## Astrologic defined: and defended.

**A**strologic is an Art, which teacheth to know the mind or meaning of the Stars: For as in Arithmetick we are taught to measure their motions, and find out their Aspects and Conjunctions: so by Astrologic we are taught to judge of their effects.

Astrologic is an Art, which teacheth by the various Configurations, Influences of the Stars, Stars, and Celestial Planets, to prognosticate of the naturall effects, and mutations to come in the Elements in these Inferiour, and Elementary Bodies: which definitions containes not only the causes, but also the consequences of the nature and essence of Astrologic; but both also express the end or final cause, to which all the precepts of the Art are to be referred.

When the Scripture speaks of the Stars, it nameth them the Signes of Heaven, Jer. 16. 22, and Gen. 1. 14. Upon which Melancthon saith thus:

Non sic Ieremias, nihil esse ligna caeli, sed

signa

## A Prognostication.

signis non tunc timere. **U**bi cum nominibus signa  
partem habent, affirmat.

**Q**uod etiam alio modo in the words of Moses.  
in Gen. 1.

Simpliciter Lunam cum Sole & Stellis in firma-  
mento Coeli Moses dicit positas, ut essent signa  
futurorum eventuum, sicut experientia de Eclipsi-  
bus, magnis Conjunctionibus, & aliis quibusdam  
Meteoris docet.

Sometimes it calleth them the Host and Ar-  
my of Heaven, amplifying thereby the Divine  
Power of God in those adured Instruments, by  
which he governeth the Frame of this corrupti-  
ble world: as may be seen in Gen. 2. King.  
23. and in Judg. 5. In which last Text is ex-  
pressly written, That the Stars fought from  
Heaven. The Stars in their courses fought a-  
gainst Sissera & his host, had the heavens and stars  
no force at all, the Scriptures would never di-  
stinguish between the sweet influences of the Be-  
liden, and the binding virtues of Orion: but the  
Scripture makes such a distinction, in Job 38.  
2. for also Deut. 33. 14. and Psal. 136. In which  
last Text the words be these: And it shall come  
to pass in that day, I will beat, saith the Lord, I  
will beat the Heavens, and they shall beate the  
stars. By which is gathered, that what, in certaine  
other places is said of some of the stars, is true  
of all the rest.

And for the searching into these things, there-  
by to be instructed concerning the event of such  
things

things as are thereunto belonging, the scriptures  
againeth both said, that the words of the Lord are  
great, and brought out of their mouths both pleasure  
therein, Psalm. xxi. 2. *וְיִשְׂרָאֵל יִשְׂמְעוּ וְיִשְׂתַּבְּחוּ*

we find therefore, that the children of Israel  
are spoken of as men of eminency, in re-  
gard that they had understanding, of the times,  
to know what Israel ought to doe; *וְיִשְׂרָאֵל יִשְׂמְעוּ* 12.

32. Moses and Daniel are commended, like-  
wise for their education and skill: the one, in the  
learning of the Egyptians; the other, in the lear-  
ning of the Chaldeans, as we read in Acts. 17.  
in Dan. 1. 17. *וְיִשְׂרָאֵל יִשְׂמְעוּ* *וְיִשְׂתַּבְּחוּ*

And from whence was it that these Nations  
had their skill, but from Noah and Abraham, if  
Josephus or Berodun may be credited: *וְיִשְׂרָאֵל יִשְׂמְעוּ*  
I doubt not therefore, but that the signs of  
Noah may lawfully enough be looked into and  
judgment be given of future events: In the  
knowledge of which Art, some come a great deal  
short of others, & do only see superficially, whilst  
others of deeper Judgments, and more conser-  
vant in studies of this nature, will goe farre be-  
yond them. *וְיִשְׂרָאֵל יִשְׂמְעוּ* *וְיִשְׂתַּבְּחוּ*

---

### Of the Eclipses this year.

**T**here be foure Eclipses this yeare, two of the  
Moone, and two of the Sun, of which onely  
and that of the Moone, will be visible in our Pa-  
rison. *וְיִשְׂרָאֵל יִשְׂמְעוּ* *וְיִשְׂתַּבְּחוּ*

## A Prognostication.

The proportion of the pound Aboir du pois to the pound Troy, is as 16 to 12, so that 16 pounds Aboir du pois are equal 12 pounds Troy. The proportion of the ounce Troy to the ounce Aboir du pois is as the 12 to 16, so that 12 ounces Troy are equal to 16 ounces Aboir du pois. Therefore the pound Aboir du pois, is greater than the pound Troy, and the ounce Troy is greater than the ounce Aboir du pois.

Whatsoever the King the Bishop or Strike, the Count or others, penny white, is by Troy, 7 ounces, penny weight, by Aboir du pois 8 ounces. And the Countrey makers penny white by Troy, 7 ounces, penny weight, by Aboir du pois 8 ounces, no one quarter. If the Baker want one ounce in 16 ounces of this assize, he shall suffer the pillory without any fine or admonition, &c.

## Astrologicall Elections, &c. briefly described for administration of Physick and Phlebotomy.

**A**S in all other parts of Physick, so in Phlebotomy, or letting of blood, first skillfully and circumspectly is to be considered and certainly known the cause. As whether it be needfull and good to the Patient, as that it be to purge the body of some unnaturall, naughty, and superfluous humour. For otherwise, letting of blood is very dangerous, and openeth the way to many grievous infirmities. And note generally, that it is not

## A Prognostication.

not convenient, either for a lean and weak man,  
nor for a very fat and grosse man to be let blood,  
neither for a child under 14 yeares of age, nor an  
old man above 60.

From these remaineth to be considered, how  
standeth with the patient inwardly, for his com-  
plexion and age, and outwardly, for the time of  
the yeare, time of the day, and yet.

For the Complexion, let blood be  
Phlegmatick, } The Moon } Libra or Aquarius,  
Sanguine } being in } Cancer or Virgo,  
Choleric } } either of these.  
Melancholick }

For his Age, let blood be his  
Youth, from the change to the first quarter;  
Middle age, from the first quarter to the full;  
Elder age, from the full to the last quarter;  
Old age, from the last quarter to the change.

The time of the Yeare  
Spring good. Harvest indifferent.

For the time of the Moneth.  
The Moon in Taurus, Gem, Leo, Vir-  
go, or Capricorn.  
The day before, not after the change  
and full.  
Twelve houres before and after the  
quartiles  
The Moon with Jupiter or Mars edill  
aspected.

The

# A Prognostication. A

The time of the day. Morning after Sun rising, fasting: After noon, after perfect digestion: the Ayre temperate, the wind not South.

## Diet after bleeding.

Sleep not presently, Airre not violently.

Use no Vencry, Feed thou warily.

Notwithstanding, for the Phrensie, the Pestilence, the Squintallie, the Plague, the Apoplexie, a continuall sweate, a growing of cholley or blond, a hot Burne, a Fever, many other extreame paine, in this case a man may not tarry a chosen time: but incontinently, with all convenient speed, he is to take his remedy: but then blood is not to be let in so great a quantity, as if a chosen time might be respected.

This note was delivered to me  
from a boat August 1647 by  
Robert Willi Garrison and Willi Wiat  
as follows etc.

we are at hand made a deed to  
my brother Dr. Edward and my son  
and daughter in law I do not  
desire to see from the least little  
your visit and we are at  
blame the one half of the  
message we are of now time  
for turning of life, but I  
propose I am a Christian and  
it and my desire is that it  
may be desired and all other  
things that are not  
and at so look for performance  
of my part of God so will  
perform all covenants and  
promise of God and not look  
for it even yet and my hope  
and for performance of same  
but put my hand to the
